

BODY ART BODY SMART BRANDING

BODY BRANDING

I want...

- a studio that is clean and carpet-free.
- my artist to show me their branding portfolio.
- my artist to wear latex gloves.
- a studio with a regularly serviced autoclave sterilizer.
- a branding steel created just for me.
- my steel heated to 850-950° F.
- my steel after the job is done.
- my artist to tell me about after care.
- my artist to be informed about

Hepatitis and **HIV**.

www.youthco.org

Hepatitis C and **HIV** are viruses transmitted through blood-to-blood contact. If infected blood gets into your blood stream through piercing equipment, you may be at risk of infection. There is no vaccine to prevent the spread of **Hepatitis C** or **HIV**. There is no cure for **Hepatitis C** or **HIV**.

For more info contact: **YouthCO AIDS Society**
Phone: **1.877.YOUTHCO** Email: information@youthco.org
