

These Kits Contain:

- Straight Shooter (glass pipe w/ mouthpiece)
- Alcohol Swabs
- Vaseline (lip balm)
- Chewing Gum
- Matches
- Metal Screens
- Latex Condom
- Water-based Lube

* The Straight Shooter is a pipette made from double-fired glass with rounded tips to help prevent cuts to the fingers and lips. It doesn't heat up as quickly as some metal pipes and won't give off poisonous fumes like water bottles or inhalers

* Everyone should have their own pipe

* You should use several screens in the pipe

* Place in screen(s) level with the tip of the stem, break up your rock and sprinkle onto the screen

* Touch the flame to the stem briefly to melt the rock instead of concentrating the heat and move the flame along the stem to spread out the heat

* Drink lots of water

* Clean your pipe regularly

* Take care of yourself

Safety Tips:

- Use Vaseline on your lips to keep them from cracking and burning – this helps stop the spread of diseases like HIV, Hepatitis B & C and Herpes
- Avoid sharing pipes. If you must share, clean the mouth piece with alcohol swabs in the kit
- Vaseline is for your lips – when you fuck, use a latex condom covered with water-based lube
- Always use a latex condom when giving a blow job and make sure you don't have Vaseline on your lips
- Chew sugar-free gum to stop your teeth from grinding
- Allow time for the pipe to cool before using it again
- You can make a mouth-piece with an elastic band, matchbook cover or a piece of tape so you don't hurt your lips or catch someone else's germs
- Clean your pipe when it is cool
- Replace screens as often as possible
